Use Case: MM_Move

Summary: This is how the user changes the selected item in the main menu.

Priority: low

Extends: -

Includes: -

Participator:User, System

Normal flow of events

	Actor	System
1	Presses up/down key	
2		The item one step above/below of the currently selected item becomes red; this is the new selected item.
3		The previously selected item becomes white.

Alternative Flow

If the item at the top/bottom of the list is the current one.

	Actor	System
2.1	Presses up/down key	
2.2		If the item is the highest/lowest in the list, nothing happens.
